www.linkedin.com/in/sgaurav03/

Areas of Exposure

- Data Analytics
- Agile Methodology
- Application Development
- SDLC/ SDF
- Bug Fixing
- Automation
- Operational Excellence
- Team Management
- Data Engineering
- Data Quality Assurance
- Troubleshooting and Issue Resolution
- Data Metrics and Analysis

Skills

- **Languages & Frameworks:** Python, SQL & Flask
- **Cloud Platforms:** MS Azure, Google Cloud, DataBricks
- **Version Management:** Github & Tortoise SVN
- **Tools & IDEs:** Microsoft VS Code & Jupyter Notebook
- **Libraries:** PySpark, MLFlow & Others
- **Databases:** Snowflake, Postgres, SQL

Certifications

- 2022: Spark and Python for Big Data with PySpark- Udemy
- 2022: Introduction to Cloud Computing - Udemy
- 2018: Programming for Everybody -University of Michigan
- 2018: Using Python to Access Web Data - University of Michi

Saharsh Gaurav

Data Engineer

Profile Summary

- Excelled as a Data Engineer, specializing in the creation of scalable data pipelines across diverse platforms such as Microsoft Azure, and Google Cloud Platform.
- Demonstrated expertise as a Software Development Engineer, proficient in automating back-end processes and designing Restful APIs to enhance the functionality of cryptocurrency trading platforms.
- Possess extensive experience in architecting and implementing efficient database management solutions utilizing Snowflake and Postgres for streamlined data processing.
- Proficiently leverage the Flask framework to develop Restful APIs and monitor backend processes, ensuring seamless functionality for web applications.
- Spearheaded the automation of account opening processes for banks, harnessing cutting-edge technologies and industry best practices to drive operational efficiency.
- Meticulous Software Development professional adept at identifying and resolving issues, ensuring seamless functionality and optimal performance.
- Agile-minded Developer with a proven ability to collaborate effectively with cross-functional teams, gather requirements, and deliver top-notch software solutions within strict timelines.

Work Experience

Sep'23--Dec'23 | Engineer III Consultant Data Engineer | Verizon Data Services India Limited, Chennai

Key Result Areas:

- Designing, developing, and maintaining robust data pipelines and ETL processes to ensure efficient data flow and integration.
- Implementing and monitoring key data metrics and performance indicators, providing regular reports to stakeholders for informed decision-making.
- Identifying opportunities for data process optimization, leading to a significant percentage improvement in overall efficiency and performance.
- Architecting and implementing scalable data solutions to accommodate the growing data needs of the organization.
- Collaborating with cross-functional teams to understand business requirements and communicating data engineering solutions effectively.
- Ensuring adherence to data engineering best practices and coding standards, maintaining high-quality and reliable data processes.
- Staying abreast of industry trends and emerging technologies, incorporating new tools and techniques into data engineering practices.

Mar'21- Jul'23 | Data Engineer | Costrategix Technologies Pvt. Ltd., Bengaluru

Key Result Areas:

- Spearheaded the development of robust data pipelines across diverse platforms such as Azure ML, AWS, and GCP, utilizing diverse services for seamless data processing.
- Employed Apache Airflow to efficiently orchestrate in-house pipelines, ensuring smooth data flow and process automation.
- Implemented cutting-edge database management solutions leveraging Snowflake and Postgres, optimizing data processing efficiency.
- Collaborated closely with the AI/ML and Data Engineering Team to develop robust and scalable data solutions, driving innovation and data-driven decision-making.
- Played a key role in designing and implementing data processing workflows, optimizing the Extraction, Transformation, and Loading (ETL) processes for enhanced data efficiency.
- Leveraged in-depth expertise in AI/ML and data engineering technologies to spearhead data innovation initiatives, enhancing data quality and integrity.
- Ensured strict adherence to industry best practices and standards for data security, privacy, and compliance in all data pipeline implementations.
- Proactively optimized and fine-tuned data pipelines to maximize efficiency and minimize processing time, resulting in enhanced data processing capabilities.
- Actively collaborated with cross-functional teams to gather requirements, gain insights into business needs, and deliver data-driven solutions that exceed stakeholder expectations.

Soft Skills

- ● Collaboration
- ● Negotiation
- ● Communication
- ● Networking
- ● Time Management
- ● Problem-solving

Education

- ● **2017:** MCA
University of Allahabad, Prayagr
- ● **2014:** BCA
Indira Gandhi National Open University

Freelance Experience

- ● 2017: Worked as a Freelance Engineer for the creation of a Computer Shop Management System

Personal Details

Date of Birth: 7th July 1993
Languages Known: English & Hindi
Address: Chunar, Mirzapur, Uttar Pradesh

Dec'19- Jun'20| Associate Software Developer | Oodles Technologies Pvt. Ltd., Gurugram

Key Result Areas:

- Played a key role as an Engineer in the Software Development team at Workflow Waves Platform, specializing in automating the account opening process for leading banks.
- Spearheaded the design, development, and implementation of cutting-edge software solutions to streamline and automate the account opening process, resulting in significant reduction of manual efforts and enhanced operational efficiency.
- Leveraged state-of-the-art technologies and industry best practices in software development to deliver top-notch, scalable, and easily maintainable software solutions.
- Performed comprehensive analysis and debugging of software issues, delivering timely resolutions to ensure seamless functionality of the account opening process.
- Actively participated in Agile development methodologies, actively contributing to daily stand-up meetings and providing regular progress updates to stakeholders.
- Collaborated closely with the team to develop, test, and deploy software solutions within strict timelines, ensuring adherence to project deadlines.
- Thoroughly documented software design, coding standards, and best practices, facilitating easy reference and knowledge sharing within the team.

May'18- Jul'19| Software Engineer | Extrieve Technologies Pvt. Ltd., Bengaluru

Key Result Areas:

- Performed as an Engineer for the Software Development team at Workflow Waves Platform, focused on automating the account opening process for banks.
- Played a key role in designing, developing, and implementing software solutions to streamline and automate the account opening process, reducing manual efforts and improving efficiency.
- Utilized cutting-edge technologies and software development best practices to deliver high-quality, scalable, and maintainable software solutions.
- Conducted thorough analysis and debugging of software issues, providing timely resolutions to ensure smooth functionality of the account opening process.
- Actively engaged in Agile development methodologies, attending daily stand-up meetings and providing regular progress updates to stakeholders.
- Collaborated with the team to develop, test, and deploy software solutions in a timely manner, adhering to project deadlines.
- Documented software design, coding standards, and best practices for reference and knowledge sharing within the team.

Projects

Verizon- Real-Time Modernisation

- Worked on migrating the data and code base from IBM-streams to GCP Dataflow. Migrated the stream processing language code into GCP enabled code by using java and python.

FINTECH-Financial Information Technologies, LLC, Invoice Processing Platform

- Created Machine Learning Models Pipelines for invoice data classification at a leading Liquor seller in the US and Europe, ensuring persistent accuracy of models and pre-processed data.
- Leveraged Azure Machine Learning platform for pipeline creation, and Azure SQL Database for database management.

Costrategix Technologies - Cos-CdC-Dashboard

- Led data integration of Tempo Timesheet, Jira, Appsheet, and BambooHR into Postgres for enhanced project analysis using Singer.io in Cos-CdC-Dashboard Project, Azure Virtual Machine, Apache Airflow.

Onebridge Technologies - DataCloud, Data Migration

- Implemented Data Migration Project for Smart Data and Engaging Solutions, leveraging Lambda Functions, and Snowflake stored procedures for seamless data ETL with API fetch, S3 staging, and data ingestion/upsertion for multiple project tenants.

Vimeo Inc-CDN Data Processors

- Created Data Processing Pipeline on Google Cloud Platform using Google DataFlow, Cloud Pub/Sub for CDN data processing of hosted videos.
- Enabled data analysis graphs, charts, and visuals for Vimeo Data Scientist teams via data analyst tool.

Vimeo Inc-Cloudera Migrations, Spark Job Migrations

- Successfully migrated Spark jobs from Cloudera Platform to Google Cloud Platform, leveraging DataProc for job execution, Pub/Sub for streaming data processing, Cloud Logging and Monitoring for logs and monitoring, and Cloud Build Tools for CI/CD.

Vertex Market - Crypto-Currency Trading Platform

- Developed a highly secure and user-friendly platform for global cryptocurrency trading, enabling convenient exchange of various currencies into and from cryptocurrencies.
- Implemented a Peer-to-Peer (P2P) concept, aligning with the decentralized nature of cryptocurrencies.

Extrieve Technologies - Workflow Waves, Bank Account Opening Platform

- Led the development of a robust data capture toolset, integrated with a versatile workflow manager, used by top clients such as HDFC Bank and Kotak Mahindra Bank for automating diverse account opening processes, including savings, current, loans, and so on.
